NDS OPERATIONS PROCEDURE
No. P-C016

OPERATIONS CONTROL OFFICER
11 April 1985

CABLE ADDRESSEE MODIFICATION PROCEDURE

Purpose

1. This OCO procedure describes the XCH*ADR-FILE exec file used by release and cable software. Directions for the maintenance of this file are also provided. An approved RFC is required to authorize any changes to this file. A write key, not shown here, is also required. (See Attachment A for sample file.)

2. The format of the file is: columns 1 and 2, except for the last line in the file, are the cable type number. This field requires a leading zero when applicable. Column 3 is blank. The remainder of the line should have no more than four addressees, each separated by a single space. If the cable is to go to more than four addressees, the list is continued on the next line in the same format including the cable type number. A period immediately follows the name of the last addressee for each cable type.

The last line in the file contains only '@EOF' in columns 1-4.

References

3. N/A

Responsibilities

4. The OCO is responsible for updating the cable addressee file.

Processing

5. All updates to the XCH*ADR-FILE will be made in the system text editor and will be done as follows:

a. To use the editor sign on in demand mode, then type:

@ED,UQ XCH*ADR-FILE//write-key.

You are now in the text editor. Make the change using the instructions below. If you type "OMIT" at any time during the editing session, no changes made during that session will be kept.

Approved For Release 2008/03/01 : CIA-RDP94T00858R000601110001-0

Approved For Release 2008/03/01 : CIA-RDP94T00858R000601110001-0

b. Addressees can be added, changed or deleted. You must know the 2-digit cable type number (See Attachment B). You must also know what line in the file to change. To find that, type:

LNP:

Now type the number (preceding a colon on your terminal) of the line which needs changing. If adding an addressee, type the highest line number shown for that cable type.

c. Adding an Addressee

If there are already 4 addressees, type:

```
C /.//
I cablenumber newaddressee.
EXIT
```

If there are less than 4 addressees, type:

```
C /./ newaddressee./
EXIT
```

d. Changing an Addressee

To replace one name with another, type:

```
C /oldaddresse/newaddressee/
EXIT
```

e. Deleting an Addressee

If there will be one or more names remaining on the line after the deletion, type:

```
C / addressee//
EXIT
```

If you are removing the last addressee on the line, type:

```
D
C /   /./
EXIT
```

ATTACHMENTS:
A - Sample of The Addressee File
B - List of Cable Types and Numbers
